Education and Certifications

Diverse collection of formal and informal qualifications pertaining to the role of an Electronic Security Systems Professional

If you can imagine I have worked with security systems running on dry cell batteries using eight track tapes, thru to IP based global access control systems with integrated IP video and intruder detection.

I have picked up a wealth of experience and knowledge along the way.

Add a college education in electronic repair to component level with years of workshop and field experience.

I have had the pleasure of working domestically and internationally with Fortune 500 companies and in Government, Military, Commercial, Industrial, Chemical, Transportation, Health Care, Prison, Law enforcement, Retail and Educational sectors.
